September 8, 2017

Dear Principals/Teachers:

The Scarborough Chapter of Professional Engineers of Ontario is organizing the 12th Annual Mathletics competition. The event is scheduled to be held on Halloween day **Saturday, October 21th, 2017 at the Scarborough Civic Centre – Council Chambers** from 9:30 am to 3:00 pm.

Mathletics is a competition designed by engineers to demonstrate the application of Science, Technology, Engineering and Mathematics (STEM) in everyday life. The questions show the significance of Mathematics in Technology, Engineering and Science. Every question is preceded by a succinct explanation of scientific principles and concepts. The competition is a learning tool for children rather than a race to the highest score. Students will enjoy the competition while learning important concepts. Students answer questions by the use of 'remote answering devices' called clickers.

For more information on this exciting event, and prizes, registration etc. please visit our website at: <http://www.scarborough.peo.on.ca/>

There are prizes for the teachers who register the students too. So we encourage the teachers to register the students and accompany them at the day of the event.

There will be two individual Mathletics competition events on the same day, one for Senior level (Grades 8 and 7) and the other Junior level (Grades 6, 5, 4 and 3) students. Registration will be on first come, first served basis. We will allow the first 60 students to register in each level before starting a waiting list. To avoid disappointment, please register your students early. Registrations will be accepted until **October 16, 2017**.

Kindly contact the Mathletics organizing committee Project Manager, Javeed Ahmed Khan, at mathletics@peoscarborough.ca for further information.

Sincerely yours,

Murad Hussain M.Eng., P.Eng

Chair - Scarborough Chapter of Professional Engineers Ontario
